LAVA Multi-node Review by Linaro Engineering teams

Moderation: Antonio Terceiro

TODO: super brief introduction to multi-node testing in LAVA

Linaro Enterprise Group

Review LEG multinode

Feel free to replace this slide with your actual content. Suggested structure. Please try to keep it under 10min.

- An walkthrough existing Jobs (one or two)
- What problems do you have have
- Where Multi-node can be improved to better support your use cases.

Linaro Networking Group

Review LNG multinode

Feel free to replace this slide with your actual content. Suggested structure. Please try to keep it under 10min.

- An walkthrough existing Jobs (one or two)
- What problems do you have have
- Where Multi-node can be improved to better support your use cases.

Linaro Virtualization team

Review Virtualization multi-node

- GOAL: Easy, convenient testing of KVM/Xen/QEMU.
- Try to avoid replicating VM test harness for each test
- Requires running multiple VMs on single host
- Requires running on multiple different hosts
- Requires verifying different kernel configurations
- Multi-node testing for Virtualization
  - How do we configure VMs?
  - What are the benefits (what is shared)?
  - Host to VM, VM to Host commands (e.g. apachebench)
  - IP, Multinode, complicated communication...
